

## EverSafe CloudShare for Small to Medium Business and Enterprise

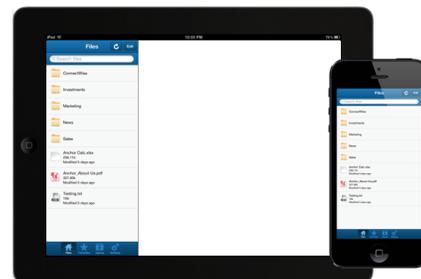

EverSafe CloudShare, an easy way for your organization to share and sync important data across multiple platforms, while keeping security a top priority. The dashboard allows administrators to keep strict policies based on your organization's needs.

---

## File Access from Anywhere

Keep all of your data, whether it is presentations, spreadsheets, pictures, or other important files with you wherever you go. Enjoy the freedom to work from smart phones, tablets, desktops, the web and laptops. Anytime a file is updated, be assured, it will be updated across all of your devices for universal file access.

## Security Unmatched

EverSafe CloudShare offers military grade, 448-Bit Blowfish, encryption. Data is encrypted both in transit and at rest in the cloud, with SSL to ensure secure data transfers. EverSafe CloudShare allows for two factor authentication for extra security measures.

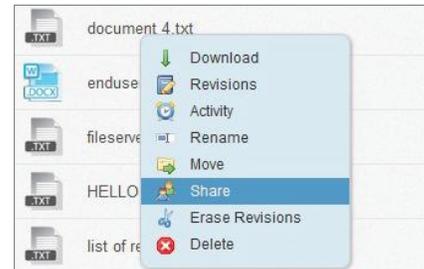

## Business Level Collaboration

It is easy to collaborate on files using Team Shares in [EverSafe CloudShare](#). Multiple people can access and share a folder and its contents through phones, tablets, and computers. Anytime a file changes on your Team Share, everyone will get updated instantly on every device.

## Share Files with Ease

Share files and folders with anyone, not just other [EverSafe CloudShare](#) users, with one click of the mouse. When sharing files with outside parties, you can add expiration dates, track downloads, and include messages. This feature is a great replacement for large email attachments and FTP.

## Access Revisions & Deleted Files

[EverSafe CloudShare](#) keeps deleted and changed files. Easily download or restore deleted files or previous versions from as far back as you need. Revisions are a great way to go back in time.

Filename	Revised	File Size	Full Size	Delta Size	Download	Restore
changes.txt	Jul 08, 2013 at 09:29PM	200b	200b		Download Current	Current Revision
changes.txt	July 06, 2013 at 06:35PM	235b	240b		Download Revision	Restore Revision
changes.txt	July 06, 2013 at 06:35PM	275b	280b		Download Revision	Restore Revision
changes.txt	July 02, 2013 at 01:50PM	332b	336b		Download Revision	Restore Revision

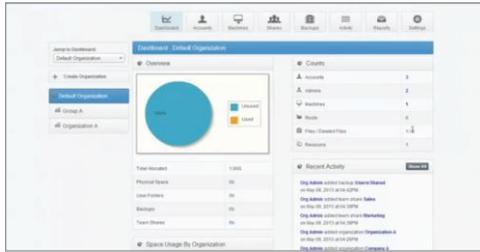

## Track Activity

[EverSafe CloudShare's](#) Activity Log tracks when users add, delete, or change files. Know when colleagues have made changes to files in your shared folders, and restore previous versions or deleted files when need.

Activity Log

## Don't Worry About Support

When using **EverSafe CloudShare**, you don't have to worry about dealing with 3<sup>rd</sup> party vendors. Your trusted internal administrator or **EverSafe IT Services** will be managing all of your accounts from one central dashboard.

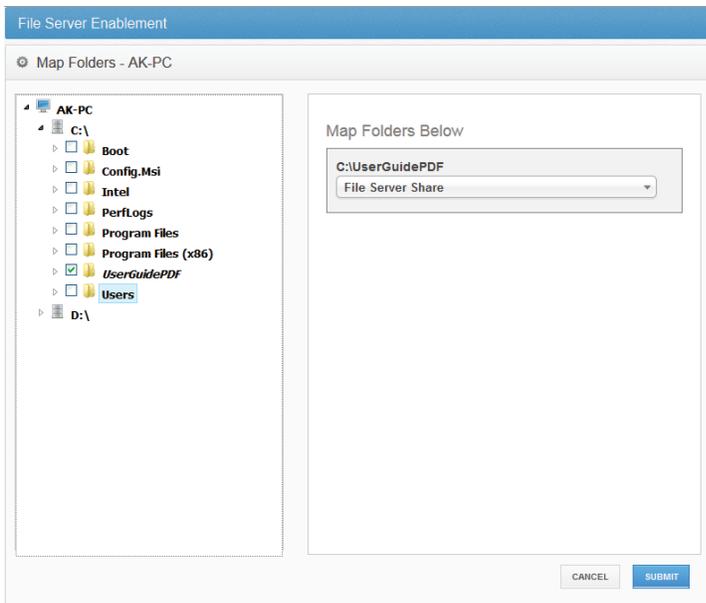

## Remote Wipes

Protect your sensitive data! With **EverSafe CloudShare**, you can remotely wipe users' endpoints with two clicks of the mouse. You can also wipe individual devices that are lost or stolen.

## Cloud Enable Your File Server

**EverSafe CloudShare** allows remote access to your file server when working outside the office and maintains a bi-direction sync with your local file server and the cloud. Changes made on the server will be synced to the cloud and vice versa. This can replace the need for unreliable and complex VPN and FTP.
